

Yanko Acuña Villaseca

Talca, Chile | +56 989570754 | yanko.acuna@gmail.com | [yankoacuna.cl](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with a Minor in Data Science and proven experience in Full Stack development, software architecture, REST API integration, databases, and cloud infrastructure. Specialized in building modern web applications using React, TypeScript, Laravel, and Python, alongside industrial process automation and AI solutions. Adept at designing scalable architectures, streamlining enterprise workflows, and integrating mission-critical platforms.

TECHNICAL SKILLS

- **Programming Languages:** Python, TypeScript, JavaScript, PHP, Java, SQL, C.
- **Frontend & Backend:** React, Node.js, Express, Laravel, Angular, Vue.js, Spring Boot.
- **Databases:** PostgreSQL, MySQL, SQL Server, Oracle Database, MongoDB.
- **Cloud, DevOps & Tools:** Microsoft Azure, GCP, Linux, Docker, Git, CI/CD, Nginx.
- **AI & Data Analytics:** Machine Learning, PyTorch, LLM Evaluation, Power BI.
- **Languages:** Spanish (Native), English (B2).

PROFESSIONAL EXPERIENCE

Systems and Processes Analyst

April 2026 – Present

Constructora Nuevos Aires

Talca, Chile

- Analyzed and mapped operational workflows to identify opportunities for digitalization, process automation, and digital transformation.
- Designed and developed custom web applications and business system integrations to streamline data flow across departments.
- Managed Microsoft Azure cloud infrastructure, overseeing application deployment, system availability, security, and maintenance.

Full Stack Software Engineer (Internship)

January 2026 – February 2026

PF Alimentos

Talca, Chile

- Architected and developed a full-stack Maintenance Planning System (React, Express, TypeScript) integrated with Oracle EAM.
- Implemented statistical models in Python for failure prediction and preventive maintenance scheduling on mission-critical assets.
- Automated key performance indicators (KPIs), work order management, and operational monitoring through data analytics.

Full Stack Software Engineer

Jan 2025 – Feb 2025 | Aug 2025

Empresas Iansa (Internship & Professional Services)

Las Condes, Chile

- Designed and implemented an IT Asset Management System utilizing Laravel, PHP, and MySQL.
- Built inventory tracking, technical auditing, and traceability modules aligned with the CIA security triad.
- Deployed and administered the application on production Linux servers, ensuring continuous maintenance, updates, and high availability.
- Re-hired on a professional contractor basis following the internship to expand system architecture and feature set.

Independent Consultant - Software & AI Specialist

December 2024 – March 2025

Outlier

Remote (USA)

- Evaluated and refined Large Language Models (LLMs) through alignment workflows and RLHF techniques.
- Authored technical coding benchmarks assessing algorithmic reasoning, code generation, and complex problem-solving.
- Assessed model capabilities across Function Calling, REST API integration, and tool-augmented logical execution.

EDUCATION

B.S. in Computer Science Engineering, Minor in Data Science

2020 – 2025

Universidad de Talca

Curicó, Chile

TEACHING & LEADERSHIP

Graduate Teaching Assistant

March 2023 – December 2025

Universidad de Talca

Curicó, Chile

- Delivered technical lectures and hands-on lab instruction in: Algorithms and Data Structures, Computer Networks, Software Architecture, Programming Languages, and Advanced Programming.
